PROFILE

Data Scientist with strong foundations in **Python, statistics, and machine learning**, experienced in analyzing large datasets, performing data preprocessing, feature engineering, and building predictive models. Skilled in applying data-driven techniques to extract insights, solve complex problems, and support data-informed decision making. Passionate about using advanced analytics and machine learning to develop impactful real-world solutions.

EDUCATION

SIMATS Engineering College, Chennai, 06/2024 – Present | Chennai
B.Tech — Computer Science (Artificial Intelligence & Data Science)
Cgpa:8.67
Couse Work: Data Structures and Algorithms, Python, Java, C++ Programming,SQL, C Programming,Software Engineering

Narayana Junior Collage, Intermediate 2022 – 2024 | Vijayawada
Cgpa:9.20

SKILLS

Programming Languages:: Python, Java,C, C++, SQL,HTML/CSS

Data Science & Machine Learning:: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, PyTorch, NLTK

Tools & Technologies:: Jupyter Notebook, Google Colab, Git, GitHub,CI/CD Pipelines,Model Deployment, Docker,Linux,Aws,Azure,Nginx,vercel

FrameWorks:: Flask,FastAPI,Streamlit

Generative AI & agentic AI:: LLM Integration, RAG, HuggingFace, LangChain, Langgraph, Vector Databases, Prompt Engineering, MCP-Servers, A2A systems, n8n Automation, TF-IDF, Word Embeddings, Sentiment Analysis

DataBases: SQLite, PostgreSQL, MongoDB, Supabase

PROJECTS

Ai-Interviewer  11/2025 – 01/2026

- Developed an AI-based platform that simulates real-world job interviews and evaluates candidate responses.
- Implemented NLP and machine learning techniques to analyze answers and generate feedback.
- Designed multi-round interview simulations including HR, technical, and behavioral interviews.
- Built a feedback system that provides performance insights and improvement suggestions for users.
- Integrated AI models to dynamically generate interview questions based on job roles and skills.

Stock Price Predictor  08/2025 – 09/2025

- Developed a machine learning model to predict future stock prices using historical market data.
- Performed data preprocessing, feature engineering, and time-series analysis on stock datasets
- Implemented regression and deep learning models to forecast stock price trends.
- Visualized stock patterns and prediction results using Matplotlib and Seaborn.
- Evaluated model performance using metrics such as MAE and RMSE to improve prediction accuracy.

Perplexity Clone  07/2025 – 08/2025

- Developed an AI-powered search assistant similar to Perplexity that provides accurate answers using large language models.
- Implemented Retrieval-Augmented Generation (RAG) to fetch relevant information from knowledge sources before generating responses.
- Integrated vector databases for semantic search and efficient information retrieval.
- Built the system using Python with modern AI frameworks and APIs for intelligent question answering.
- Designed the application to deliver contextual responses with improved accuracy compared to traditional search methods.

Ai-Doctor 06/2025 – 07/2025

- Developed an AI-based health assistant that analyzes user symptoms and provides possible disease predictions using ML Techniques
- Implemented data preprocessing and predictive models to identify health risks based on input symptoms.
- Designed the system to recommend basic health guidance and possible treatment suggestions
- Built the application using Python with data science and machine learning libraries.

CERTIFICATES

Complete Datascience ,ML,DL,NLP Bootcamp - Udemy 

Completed a comprehensive program covering Python for data science, statistics, machine learning, deep learning, and NLP, with hands-on projects using Pandas, NumPy, Scikit-learn, TensorFlow, and PyTorch.

Complete RAG ,Langchain,Langgraph& LLM Bootcamp - Udemy

Learned to build AI applications using Large Language Models and Retrieval-Augmented Generation (RAG), including embeddings, vector databases, semantic search, and frameworks like LangChain.

LANGUAGES

- Telugu
 - Hindi
- English
 - tamil

ACHIVEMENTS

Team Leader — Smart India Hackathon Participant

Built and deployed production-grade Mock Interview platform (Ai-Interviewer)

Active participant in Machine Learning, AI, and hackathons
